

SAR Booking Website

A simple and modern web portal featuring an AI Voice Assistant

Built using: HTML , CSS , JavaScript , PHP

Welcome Screen (Home Page)

Main Entry Point

We designed a clean and official looking home screen that makes travel planning feel simple and direct.

- ✓ **Simple Layout:** Easy navigation bar to explore different pages quickly.
- ✓ **Official Look:** Green themed design that matches SAR.

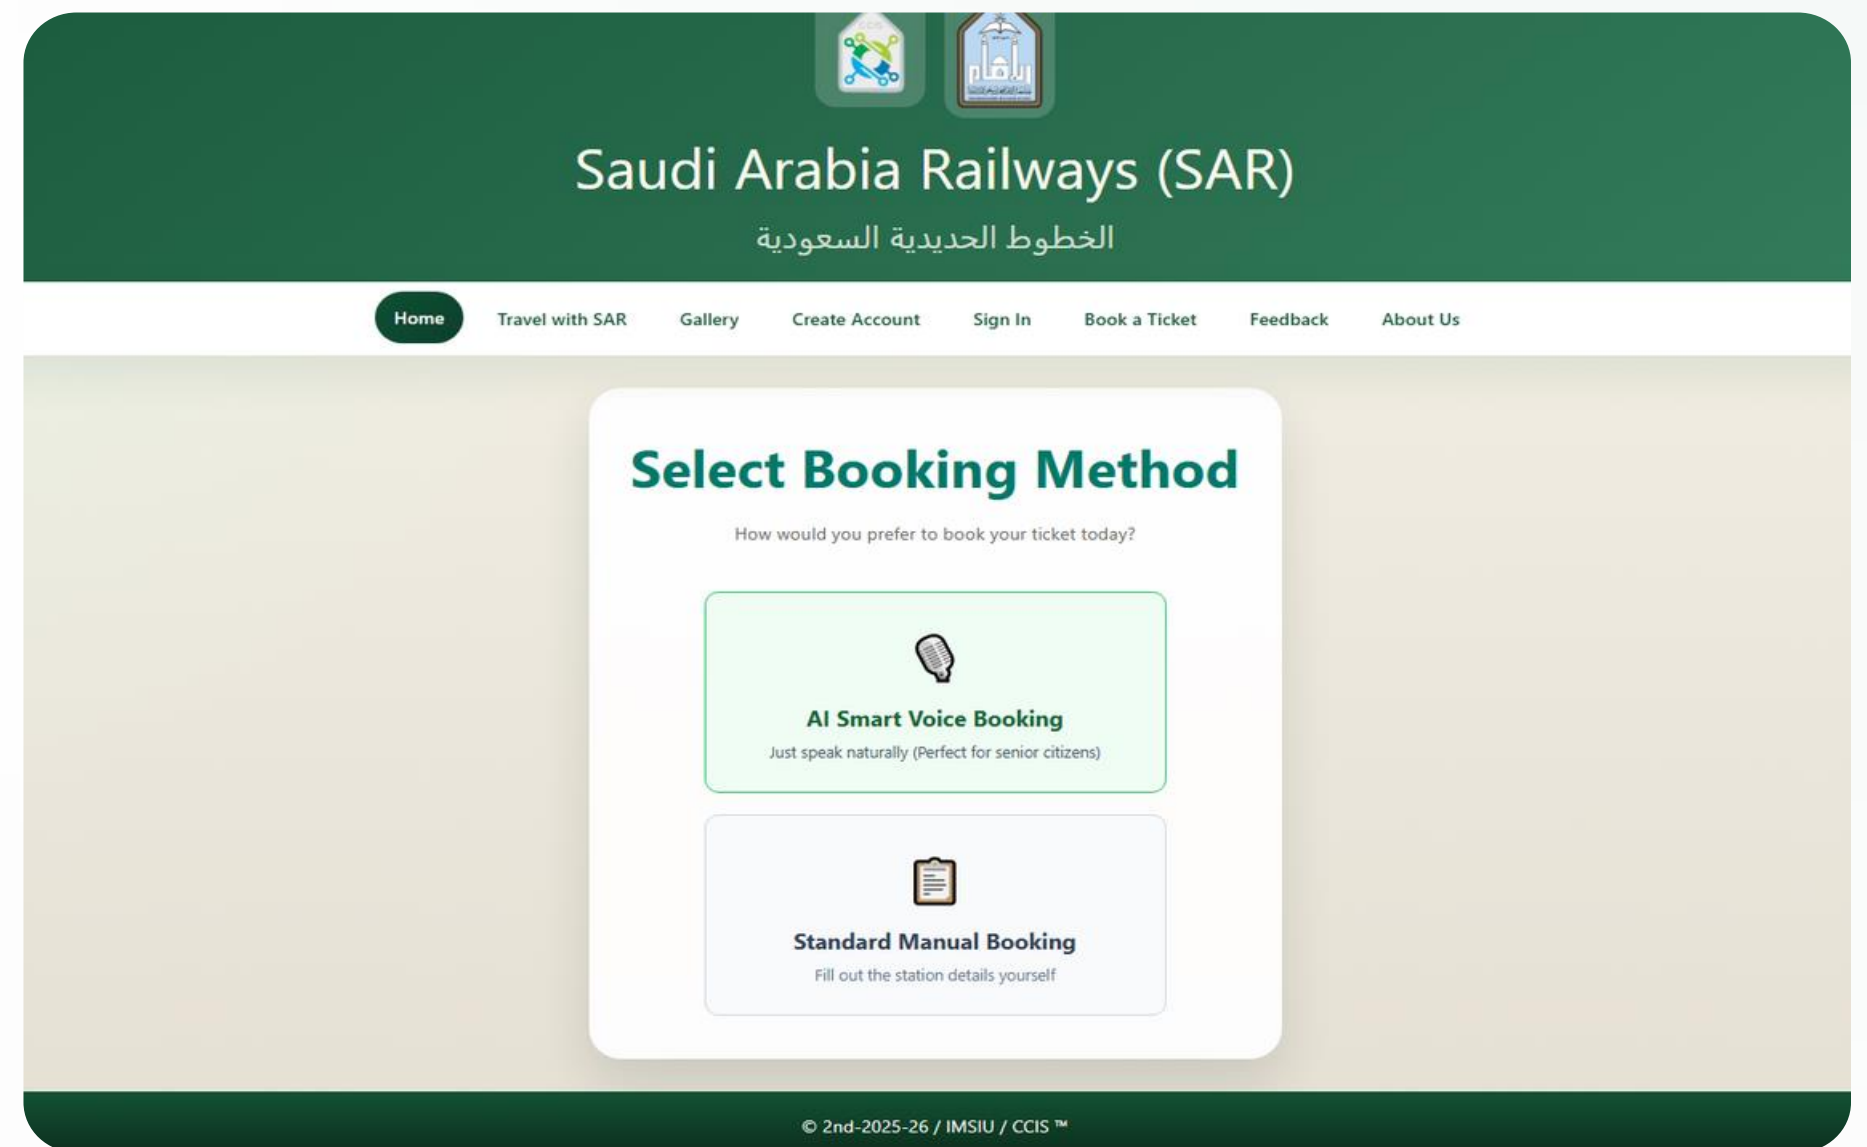

Selecting Your Booking Method

Dual Booking Options

We built two separate ways to book a ticket to make our website highly accessible and easy for everyone to use.

 **Smart Voice Assistant:** Great for hands free booking or senior users.

 **Standard Booking:** Traditional form with dropdown options for fast manual typing.

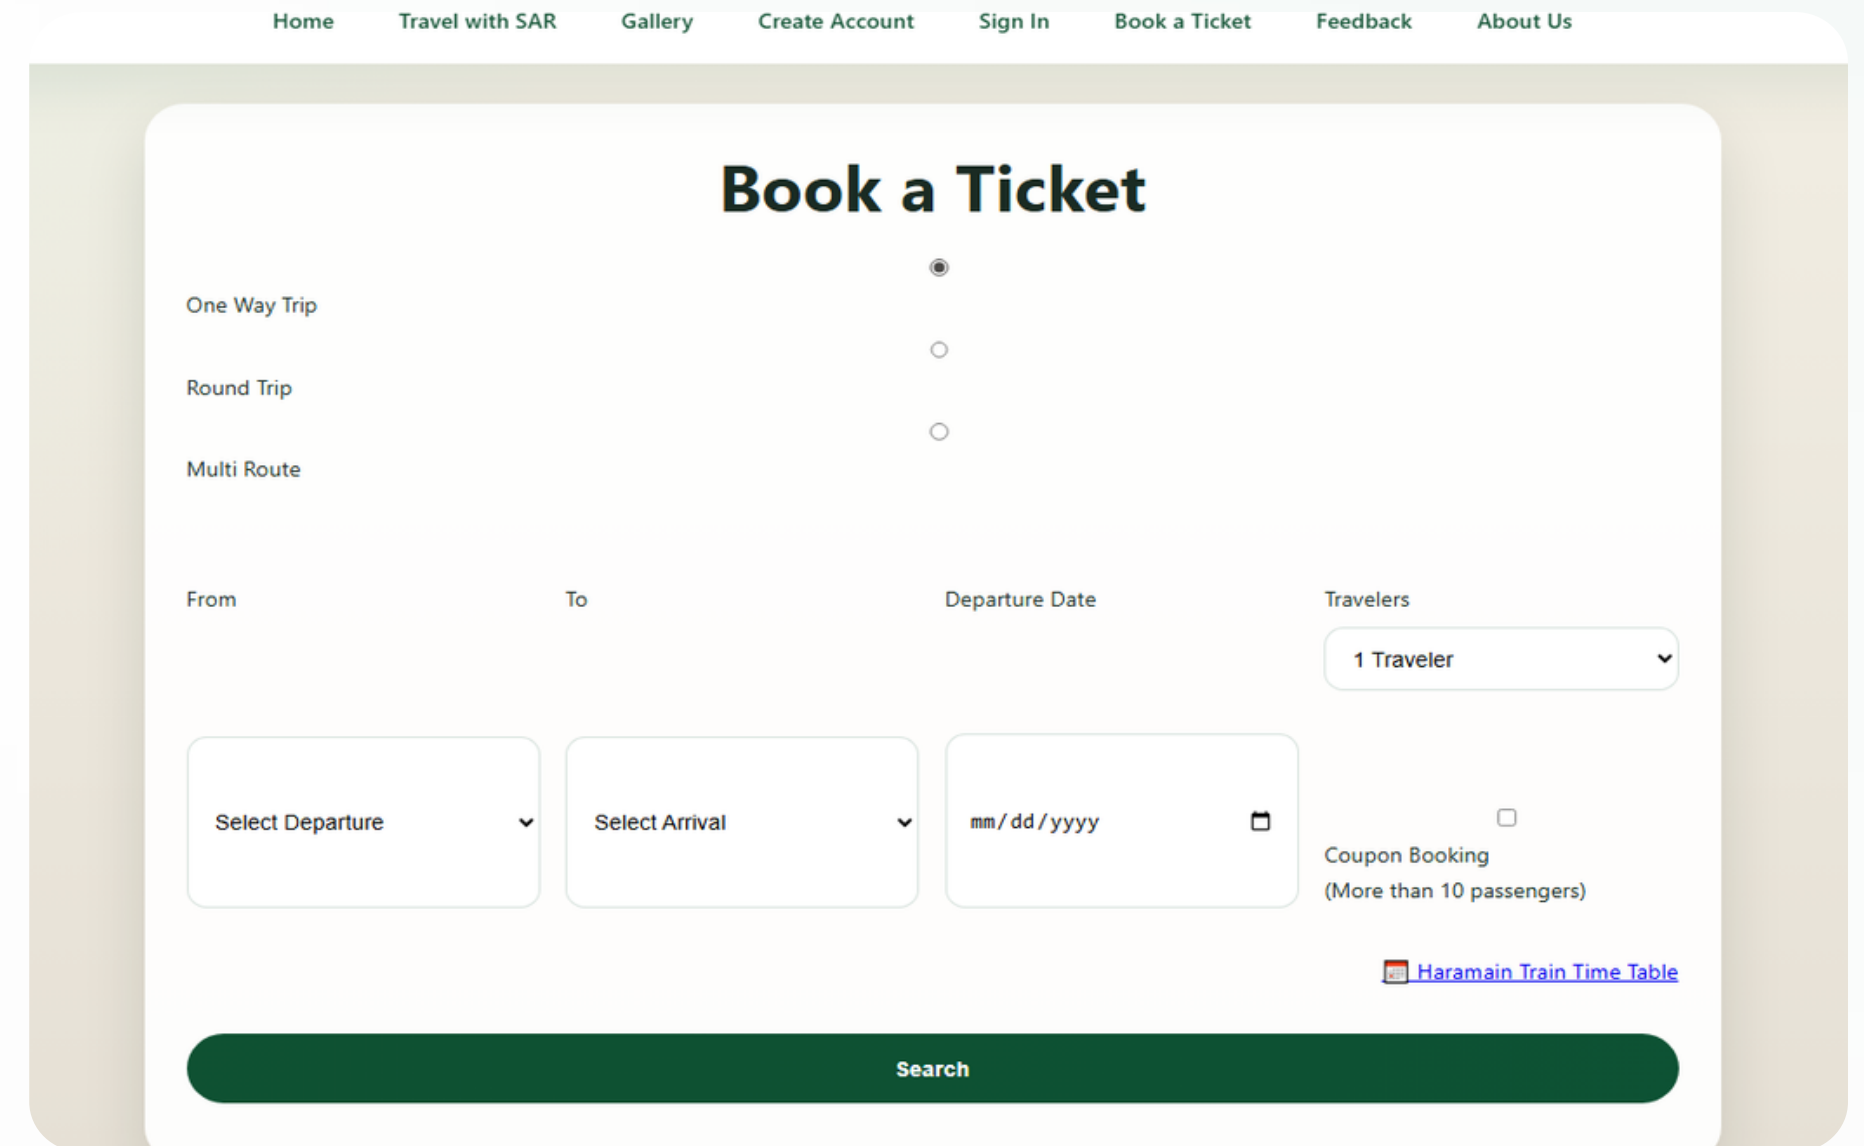

Traditional Manual Booking

Manual Form Parameters

If users prefer to click and search, they can use our fully structured booking engine.

 **Trip Details:** Allows choosing one way, round trip, or multi-routes.

 **Form Control:** Includes simple selectors for departure date, traveler count, and city dropdowns.

The screenshot displays the 'Book a Ticket' form on the Saudi Arabia Railways (SAR) website. The form is titled 'Book a Ticket' and features a navigation bar at the top with links: Home, Travel with SAR, Gallery, Create Account, Sign In, Book a Ticket, Feedback, and About Us. The form includes three radio buttons for trip type: 'One Way Trip' (selected), 'Round Trip', and 'Multi Route'. Below these are four input fields: 'From' (with a dropdown 'Select Departure'), 'To' (with a dropdown 'Select Arrival'), 'Departure Date' (with a date selector 'mm/dd/yyyy' and a calendar icon), and 'Travelers' (a dropdown showing '1 Traveler'). A checkbox for 'Coupon Booking (More than 10 passengers)' is also present. At the bottom right, there is a link to 'Haramain Train Time Table'. A large green 'Search' button is located at the bottom of the form.

| Smart Voice Assistant

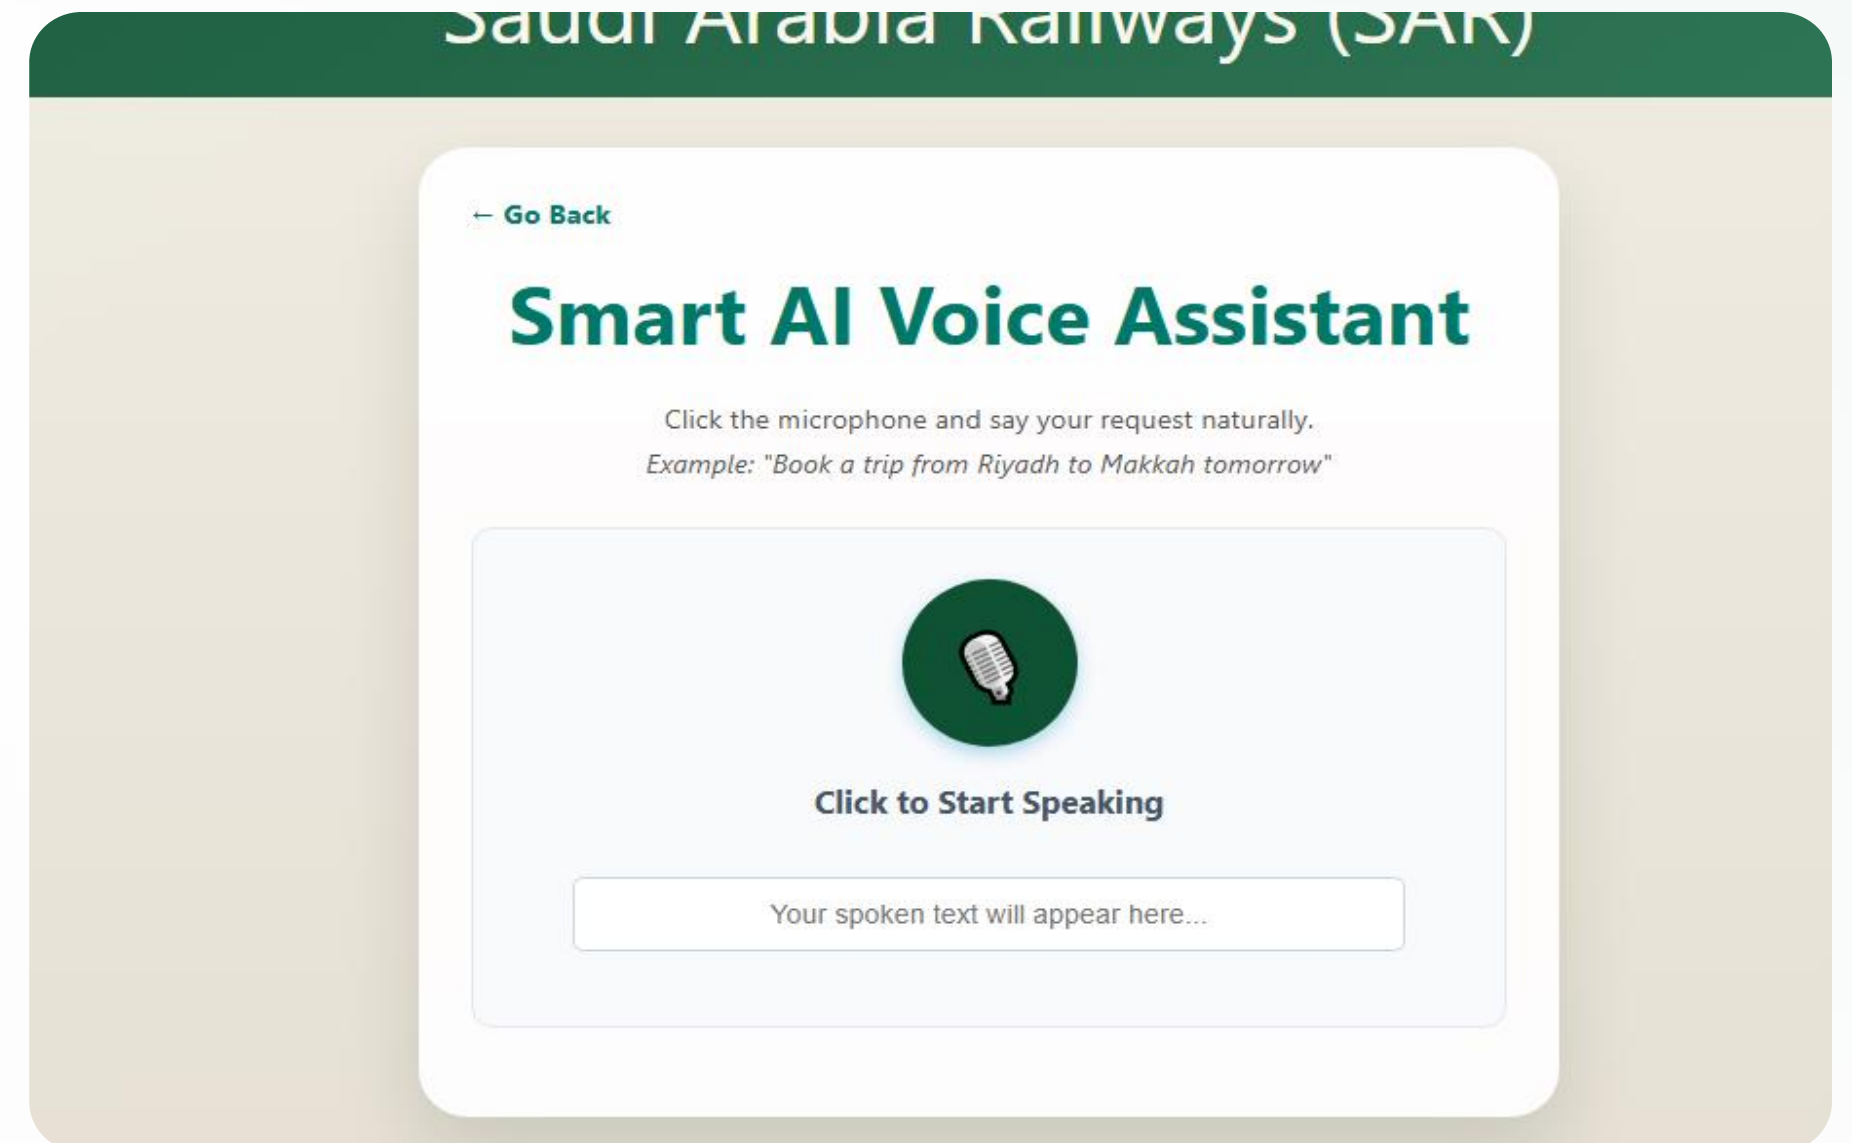

Speak Naturally to Book

This is the highlight of our project! It listens to your voice, grabs the details, and submits the form automatically.

 **Listening:** Captures audio and converts it to text using the Web Speech API.

 **Parsing Info:** Extracts cities (like "Riyadh") and dates (like "tomorrow").

 **Auto-Fill:** Instantly fills fields and submits the booking.

| Speed Meets Validation Safety

75%

Faster Booking Journey

Voice: 6 seconds average completion

Typing: 24 seconds average completion

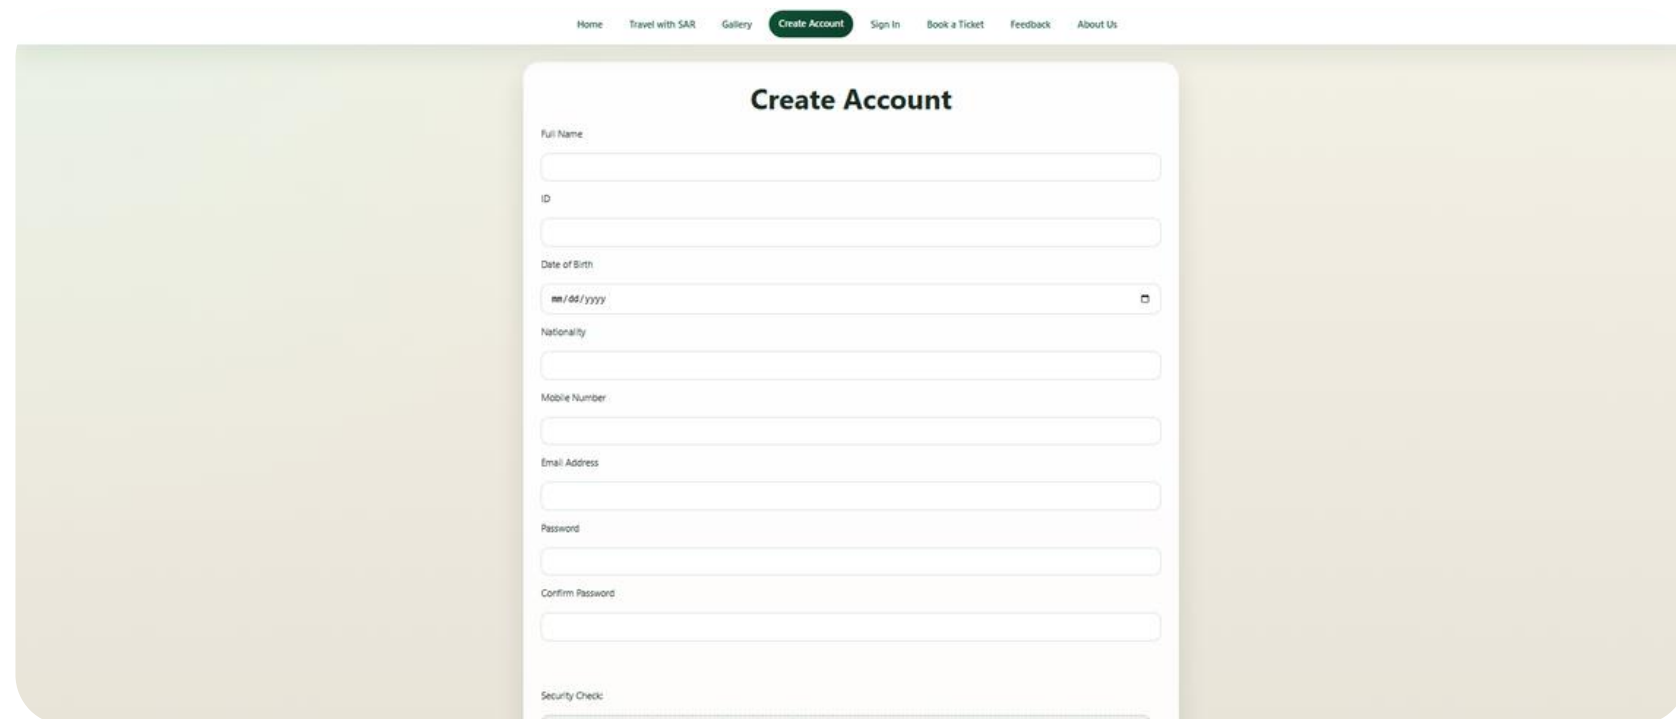

Smart Logic Checks

-  **Circular Trip Block:** Our JavaScript immediately stops users from picking the same starting and ending station (like Riyadh to Riyadh).
-  **Dynamic Guide Alerts:** Prompts clean, immediate warning text and helpful tips to tell users how to retry correctly.
-  **Form validation:** Keeps empty or bad inputs from making useless requests to the PHP backend.

User Registration & Sign In

Register Account

New users enter their Name, ID, Mobile, and password. Fully wired with CAPTCHA protection to stop bots.

The 'Create Account' form is displayed on the SAR website. It features a white background with a light beige border. The form fields are as follows:

- Full Name:
- ID:
- Date of Birth:
- Nationality:
- Mobile Number:
- Email Address:
- Password:
- Confirm Password:
- Security Check:

The top navigation bar is dark green with white text. The 'Create Account' button is highlighted in the navigation bar.

Secure Sign In

Validates credentials through our PHP backend database, starting secure browser sessions for passengers.

The 'Sign In' form is displayed on the SAR website. It features a white background with a light beige border. The form fields are as follows:

- Email Address:
- Password:
- Security Check:
- Refresh: [Refresh](#)
- Type the characters you see above:

The top navigation bar is dark green with white text. The 'Sign In' button is highlighted in the navigation bar.

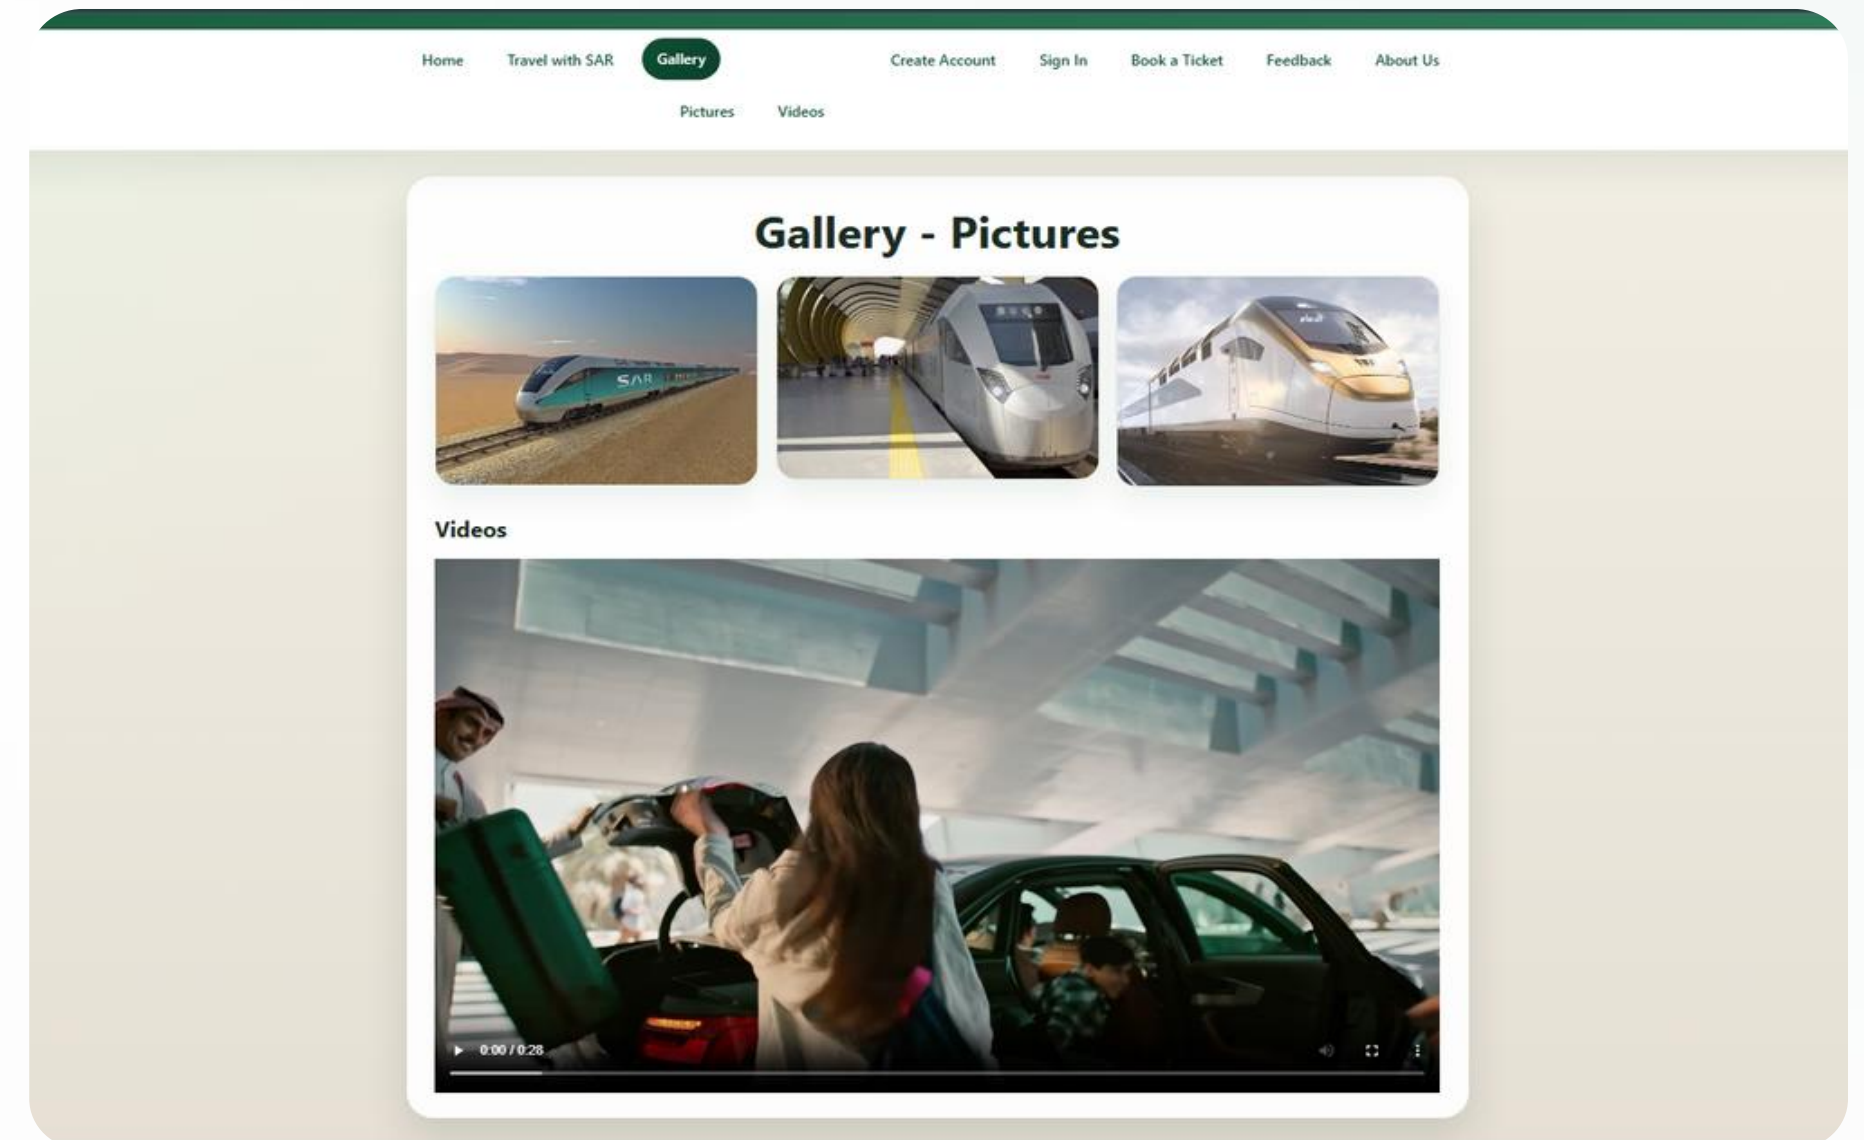

Visual Train Gallery & Guides

Media Page

To help users choose their transit style, we built a beautiful gallery showcasing Haramain and SAR trains.

 **Visual Gallery:** Features clear high definition photos of trains and routes.

 **Video Player:** Includes native video streams illustrating the real railway experience.

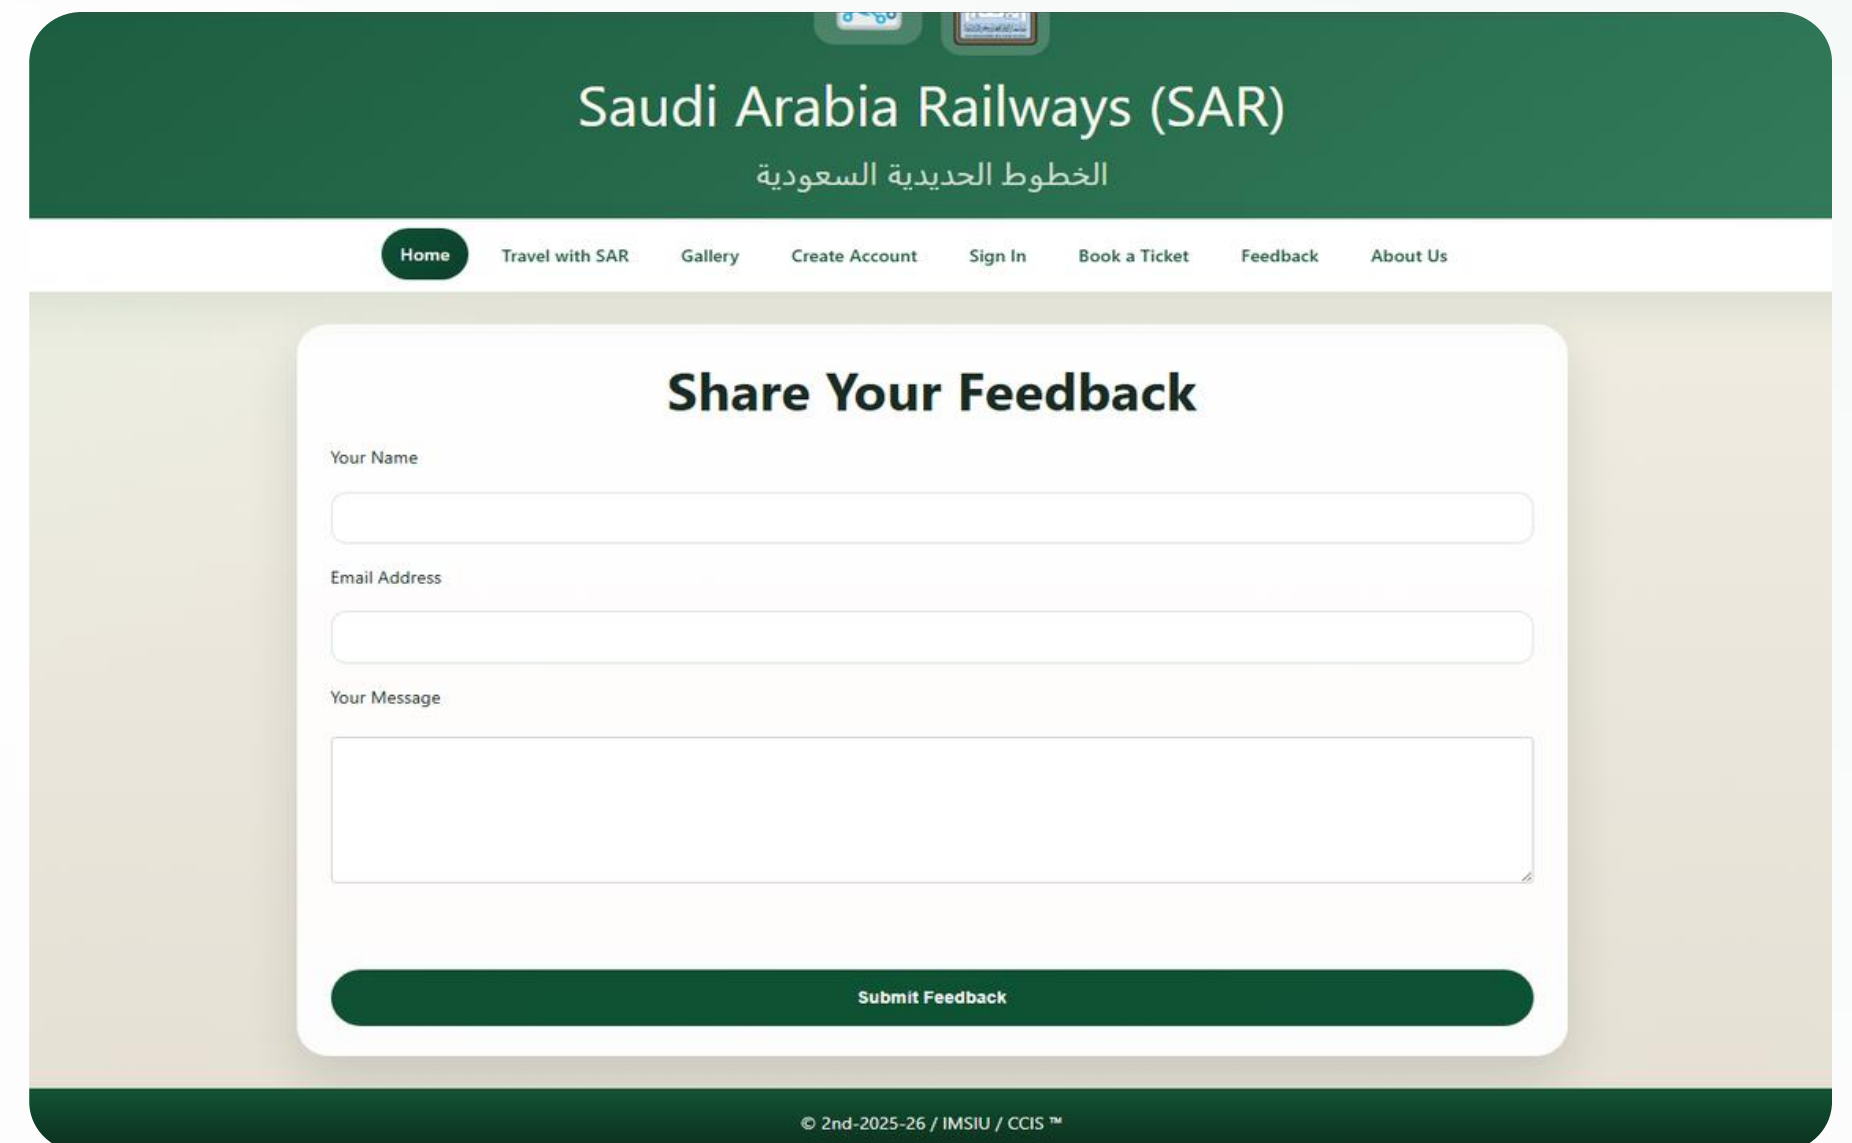

User Support & Feedback Form

Passenger Communication Gate

We created an interactive channel where passengers can reach out to the team directly with comments, queries, or reviews.

➤ **Direct Delivery:** Captures name, email, and messages to deliver to our backend.

🎧 **Support Link:** Designed to offer immediate feedback channels for overall client satisfaction.

The screenshot displays the 'Share Your Feedback' form on the Saudi Arabia Railways (SAR) website. The header is dark green with the SAR logo and name in English and Arabic. A navigation bar includes links for Home, Travel with SAR, Gallery, Create Account, Sign In, Book a Ticket, Feedback, and About Us. The feedback form itself is a white card with a green border, containing three input fields: 'Your Name', 'Email Address', and 'Your Message'. A green 'Submit Feedback' button is at the bottom. The footer is dark green with copyright information: '© 2nd-2025-26 / IMSIU / CCIS™'.
